

VITRO LEFT CORNER

CONCENTRIC FLUE FIREPLACE WITH AUTOMATIC BEV[®] BURNER

Net Zero fireplace with BEV Technology[®]

AUTOMATIC BEV[®] BURNER

The BEV Technology[®] guarantees burning that is free of smoke, odor, or ash. This technology creates a flame by burning ethanol vapors, ensuring that the fire has no direct contact with the liquid fuel.

HIGH-VIEW DESIGN

The fireplace features tall, sleek glass panels that offer an unobstructed view of the flames, turning the fire into a striking decorative element that enhances the overall design of your space.

CONCENTRIC FLUE FIREPLACE

The fireplace uses a concentric flue system designed to extract heated air, perfectly complementing the BEV[®] technology for optimal performance and efficient combustion.

NEW BURNER DESIGN

The unique log setup, supported by special brackets, creates a deeper, more dynamic flame display. This innovative design mimics the natural look of a bonfire, adding depth and dimension to your space.

GLASS ENCLOSED

Experience the perfect blend of elegance and efficiency with our modern closed fireplace featuring tempered glass, offering unparalleled heat retention and safety for your home.

EXTERNAL CONTROL PANEL

Install the external panel below the fireplace or in a nearby wall – wherever it suits your design. It features an LCD screen and a built-in refueling port for easy access.

Vitro Left Corner Concentric Flue Fireplace

Fuel tank capacity	10.5 L 2.3 gal
Maximum burn time	17 hours
Maximum heat output	9.5 kW 32 415 BTUs/h
Minimum room cubature	not applicable
Flame height regulation	6 stages
Weight	155.0 kg 342.0 lbs
Fuel type	bioethanol 95 - 96,6%
Flue	concentric flue (available seperately)
Air change rate	1 space volume per hour
Power supply	230 V 115 V
Finish	black powder coating
Materials	steel, galvanized steel, tempered glass
Application	for indoor use only
